

## Mortality Following Hip Fracture Repair in California Hospitals, 2012-2013

Field Title	Field Name	Data type	Description
Year	Year	Plain Text	Year of discharge
County	County	Plain Text	County in which the hospital is located
Hospital	Hospital	Plain Text	Name of hospital reporting
OSHPDID	OSHPD ID	Plain Text	A unique number established by the Office of Statewide Health Planning and Development (OSHPD) for identifying facilities and used in the Licensed Facility Information System (LFIS). The first three numbers identify the type of facility, the next two represent the county number, and the last five are randomly assigned within each county.
# of Cases	Number of Cases	Numeric	Number of patients who had hip fracture repair in this hospital
# of Deaths	Number of Deaths	Numeric	Number of hip fracture repair patients who died within 30 days of admission to this hospital
Observed Rate	Observed Rate	Numeric	Observed hip fracture repair mortality rate in this hospital
Expected Rate	Expected Rate	Numeric	The expected hip fracture repair mortality rate in this hospital if they had a mix of patients that was comparable to the average hospital in California
Risk Adjusted Rate	Risk Adjusted Rate	Numeric	The Risk Adjusted Mortality Rates (RAMR) presented here adjusts the observed mortality rates. This statistical methodology takes into account pre-existing health problems that put some patients at greater risk of death to “level the playing field” and allow fair comparisons across hospitals.
Hospital Ratings	Hospital Ratings	Plain Text	Comparison rating based on a 98% Confidence Interval (CI). If a hospital’s upper CI is less than the statewide observed rate, it is designated as performing “better” than the average hospital. If a hospital’s lower CI is greater than the state rate, it is designated as performing “worse” than the average state hospital.
Longitude	Longitude	Numeric	Longitude of hospital

Latitude	Latitude	Numeric	Latitude of hospital
