Dataset: combined_2011-2022_ca_hospital_ratings

Column Name	Data Type	Description
year	int64	Year of discharge
county	string	The county in which the hospital is located.
hospital	string	Name of the hospital.
oshpd_id	string	Unique identifier established by the Office of Statewide Health Planning and Development (OSHPD). The first 3 numbers identify the type of facility, the next 2 numbers represent the county, and the last 5 numbers are randomly assigned.
performance_measure	string	The type of performance/procedure/condition measured.
#_of_cases	float64	Number of cases corresponding to the performance/procedure/condition at this hospital.
#_of_adverse_events	float64	Number of adverse events (including death, stroke, readmission, etc) corresponding to the performance/procedure/condition at this hospital.
risk_adjusted_rate	float64	A rate that accounts for variations in patient health conditions, enables fair comparison of hospitals.
hospital_rating	string	Rating based on a 95% confidence interval (CI). Hospital performance is compared to the statewide average:
		above average - The upper bound of the CI for the hospital is less than the statewide observed rate.
		below average - The lower bound of the CI for the hospital is more than the statewide observed rate.
		average - The CI for the hospital overlaps with the statewide average.
		none - Rating not provided.
