Agency for Healthcare Research and Quality Inpatient Mortality Indicators for California Hospitals, 2016-2022

Field Title	Field Name	Data type	Description
Year	Year	Plain Text	Year
County	County	Plain Text	County
Hospital	Hospital	Plain Text	Hospital
OSHPDID	OSHPD ID	Plain Text	A unique number established by the Office of Statewide Health Planning and Development (OSHPD) for identifying facilities and used in the Licensed Facility Information System (LFIS). The first three numbers identify the type of facility, the next two represent the county number, and the last five are randomly assigned within each county.
Procedure or condition	Procedure/Condition	Plain Text	Procedure that was performed or condition that was treated
Risk Adjusted Mortality Rate	Risk Adjusted Mortality Rate	Numeric	The Risk Adjusted Mortality Rates (RAMR) presented here adjusts the observed mortality rates. This statistical methodology takes into account pre-existing health problems that put some patients at greater risk of death to "level the playing field" and allow fair comparisons across hospitals.
Number of Deaths	Number of Deaths	Numeric	Number of patients that died in this hospital
Number of Cases	Number of Cases	Numeric	Number of patients that had this medical procedure or condition in this hospital
Hospital Ratings	Hospital Ratings	Plain Text	Comparison rating based on a 95% Confidence Interval (CI). If a hospital's upper CI is less than the statewide observed rate, it is designated as performing "better" than the average hospital. If a hospital's lower CI is greater than the state rate, it is designated as performing "worse" than the average state hospital.
Longitude	Longitude	Numeric	Longitude of hospital
Latitude	Latitude	Numeric	Latitude of hospital
